Subject: fort street lot

Good Morning Amanda,

Parking Staff has completed our sampling of the Fort Street lot.

We choose two day-time samples and two night-time samples; One each on weekday and one weekend.

This is a small sample. One weakness it that it has been done only one time of the year – August in our off season. A fuller picture would have a sample from January as well.

Having said that - I think it gives a good general picture of who uses the lot and when

There are 44 parking spaces in this lot.

On Weekdays:

Morning	19 vehicles total	9 Residents	10 non-residents
Night	23 vehicles total	7 Residents	16 non-residents

On Weekends:

Morning	36 vehicles total	7 Residents	19 non-residents
Night	24 vehicles total	12 Residents	12 non-residents

Points to note:

- The lot was not at capacity at any time – no parker is denied a place to park
- On Weekdays the split is about 60 percent non-local and 40 percent residents
- On Weekends the split is about 60 percent non-local and 40 percent residents

If you have any questions about this sample or its findings, please let me know.

Thank you,

John Wilkins
Parking Director
