## RE: UPDATE Administrative Hearing for 1900-1906 Flagler Avenue

FROM: Karen DeMaria, City of Key West Urban Forestry Manager

Several site visits and one site meeting have been conducted regarding the unauthorized and improper trimming of the trees at the rear of Shanna Key. A survey provided by the adjacent property owner has determined that 7 of the 8 trees are located on 1906 Flagler Avenue.

Trees #1, #2, #3, #4, #5, #6, and #8 are Jamaican Dogwood trees. Tree #7 is a strangler fig tree. The trees are resprouting with leaves and resemble large shrubs. It will take years before they become proper trees again and that is if the new growth survives various weather/wind events through the area. Regrowth such as what is on the trees right now is very prone to breakage.

A site meeting with the two properties owners discussed removal of the trees and stumps and replanting on 1900 Flagler Avenue with an emphasis on planting along the side property line with 1908 Flagler Avenue. The owner of 7 of the trees, Michael Halpern, verbally agreed with this plan.

Standing in parking lot looking at rear property line of 1906 Flagler and side property line with 1908 Flagler.

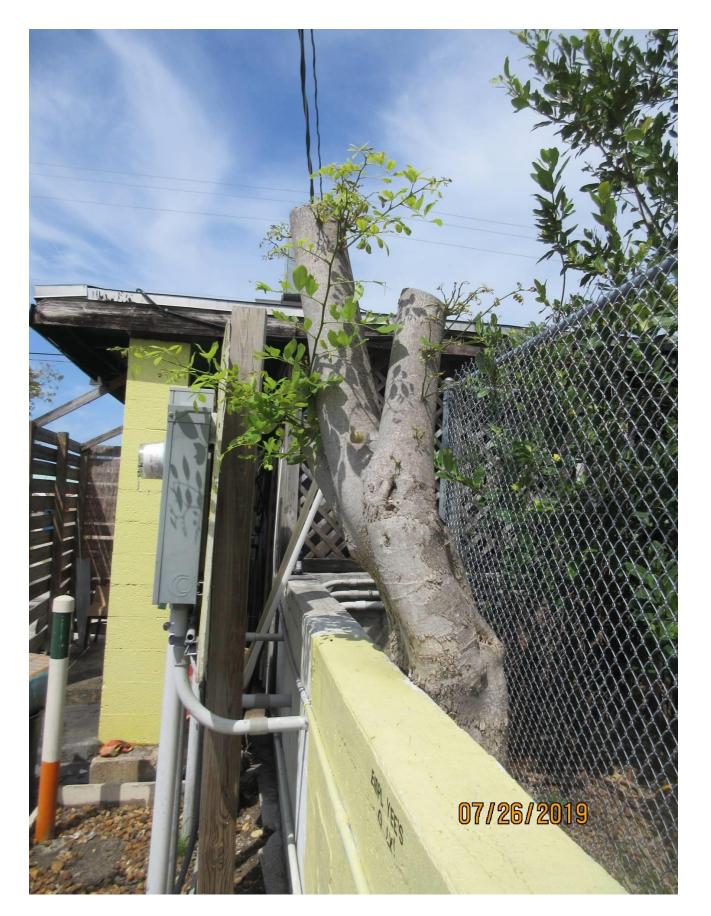

Photo of tree #1, Jamaican Dogwood. Note location of electrical lines and conduit

Two photos of trees #2 - #6, Jamaican Dogwood trees.

Photo of tree #7, Strangler Fig tree.

Photo looking west down the property line.

Photo of tree #8, Jamaican Dogwood growing along property line with 1908 Flagler.

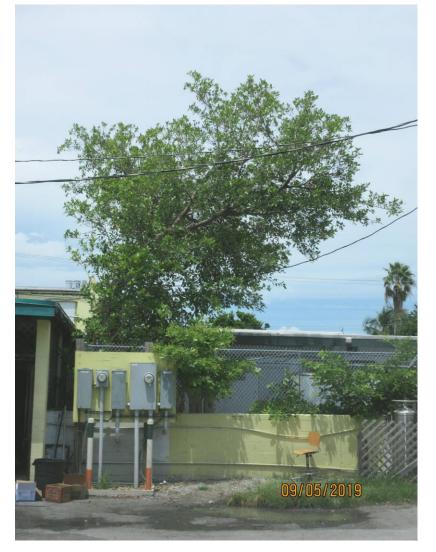

Photo looking straight at wall and part of tree area. Note, tall tree in background is not part of this review.

Subject:	1900 and 1906 Flagler Avenue Tree Commission Administrative Hearing October 8,
	2019

Barry: The administrative hearing to discuss the unauthorized tree trimming at your and Michael's properties will be heard at the October 8 Tree Commission meeting. You are expected to be there to discuss terms of a settlement agreement. As we discussed on site, I will bring a proposal to allow you to remove the existing trees and then you will be required to replant on your property with an emphasis of plantings near the dumpster and along the side property line with the Learning Center School. The Tree Commission will make the final decision.

Michael: You do not have to attend the meeting but you are more then welcome to come. I do need you to at least respond to this e-mail letting me know that as the actual owner of most of the trees, you approve and will allow the removal of the trees.

Sincerely,

Karen

Barry:

Attached is a copy of the survey for the property adjoining yours where the trees were abused-trimmed. It appears that the concrete wall is the property line. Any further discussion regarding those trees will have to include Michael Halpern, the property owner.

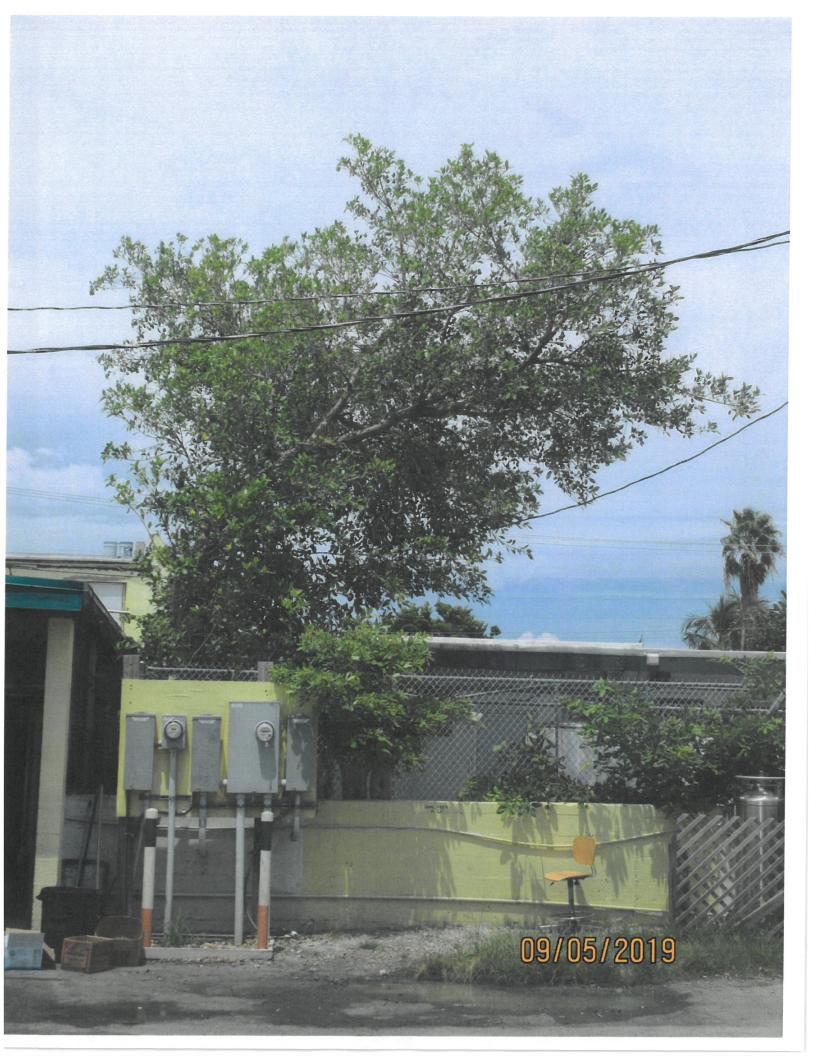

A recent visit did document that those trees along the concrete wall were regrowing. My concern is that the regrowth will need to be managed for several years to control and repair the canopy. The trimming work you did is considered tree abuse as you completely removed the canopies of all of those trees. Regrowth on such "trees" generally is not structural sound and is prone to breaking off as the growth connection is not strong on the tree. There is also one tree that is wholly on your property that was "removed" that we need to discuss.

I need to update the Tree Commission as to what is going on with this file and I need to reschedule the administrative hearing. Therefore, I am recommending a site meeting with you, Michael, and myself to determine the best course of action. I have copied Michael on this e-mail. What are your schedules like the next few weeks? I will be out of the office from August 28-September 4.

Sincerely,

Karen
