**Subject:** RE: ITB #20-003 - KWB Fire Main Replacement

Karen,

Robert MacDonald d/b/a Marina Utilities is qualified to obtain a permit for construction of a fire supply line, pump, backflow and valve equipment under his Florida Plumbing Contractor's license **CFC1427833**.

Fire Suppression Systems incl. Automatic Fire Sprinklers do require a separate license issued by the State Fire Marshall but such equipment is not included in the scope of work for this project.

Respectfully,

Terry

Terry –

Attached is the scope of work and drawings for ITB #20-003 and Marina Utilities license. Can you confirm that Marina Utilities is properly licensed to perform and will be able to obtain a City permit for the fire main and standpipe replacement here at the Seaport.

It appears they have done previous work in Key West for Tarpon Pier at City Marina fire main and standpipe installation under permit #2013-00000941.

Florida Statute 633.226

Exemptions; farm outbuildings; standpipe systems installed by plumbing contractors.—

(1) This act does not apply to owners of property who are building or improving farm outbuildings.

(2) A licensed plumbing contractor is not required to be certified under this act to install standpipe systems and the following items connected thereto: overhead and underground water mains, fire hydrants and hydrant mains, hose connections, tanks and pumps; including sprinkler heads in trash chutes and in trash rooms, having no connection to an automatic sprinkler.

Thank you
