

## THE CITY OF KEY WEST

Post Office Box 1409 Key West, FL 33041-1409 (305) 809-3700

# EMERGENCY DECLARATION

To: Gregory W. Veliz, City Manager

From: John Paul Castro, Utilities Director

Effective Date: July 16, 2020

**Action Statement:** Request the City Manager Gregory W. Veliz approve the emergency procurement to replace approximately 70 linear feet of pipe and fittings at pump station E in the amount of \$84,682.71 by Key Honey Contracting, LLC.

Ordinance: 2-797 (2) Emergency Procurement – "the city manager may make emergency procurement of commodities or contractual services where the cost exceeds \$50,000.00 when there exists a clear and present threat to public health, property, welfare, safety or other substantial loss to the city..."

#### Justification:

In the course of construction at Pump Station E it was found that approximately 70 feet of pipe and fittings from the valve vaults to the planned connection points is in extremely poor condition. Staff has worked with the project contractor, Key Honey Contracting, to create a reasonable change order to replace the pipe while on site.

It is in the best interest of the City to authorize the change order, which exceeds the \$50,000 city manager limit, prior to the next scheduled commission meeting due to delays to the pump station project and associated costs with continued bypass pumping.

Staff finds the cost fair and reasonable as well as the 21-day contract extension for the additional work to be appropriate.

The change order will be added to the purchase order for project SE1504.

### Recommendation:

Utilities request City Manager Gregory W. Veliz approve the emergency procurement of a proposal from Key Honey Contracting, LLC to approximately 70 linear feet of pipe and fittings at Pump Station E in the amount of \$84,682.71 to Key Honey Contracting, LLC.

Steve Gardner, Project Manager Utilities City of Key West PO Box 1409 Key West, FL 33041-1409

Reference: City of Key West Pump Station Rehab Phase II; C, E&D (IT 19-022) Proposal for revisions to Pump Station E

Steve,

As previously discussed, we recently exposed a large part of the existing DI influent piping at Pump Station E. The pipe is exhibiting significant signs of corrosion and degradation which is compromising its overall functional integrity. The following breakdown includes replacement of this 12" DIP, related fittings, appurtenances, additional bypass pumping activities, and restoration. This cost also includes the changes reflected in the revised piping configuration on the North end issued by Jacobs/CH2M on June 19, 2020. We are requesting 21 additional workdays for execution of this work following delivery of the materials. Orders will be placed promptly following your approval of these changes and the additional cost in the amount of \$84,682.71.

Sincerely,

Carey Hirsch, CEO

PROJECT: Key West Pump Stations Rehabilitation Phase 2, C, E, & D Manhole

DESCRIPTION: Remove and Replace existing onsite pipe at Pump Station E not shown on plans to Replace. Limits include from proposed tie in locations of new to existing on pump station E site plan dated May 2019 to Existing Station. Limits include approximately 70 LF onsite. Scope includes demolition at pump station, and Restoration for onsite piping at Pump Station E.
