

Historic Architectural Review Commission Staff Report for Item 5

To: Chairman Bryan Green and Historic Architectural Review

Commission Members

From: Enid Torregrosa-Silva, MSHP

Historic Preservation Planner

Meeting Date: February 24, 2021

Applicant: Gary the Carpenter

Application Number: H2020-0041

Address: 532-534 Duval Street and 419- 415 Southard Street

Description of Work:

After the fact demolition of first floor facades. Removal of concrete front porch slab of 419-425 Southard Street.

Site Facts:

The site under review is located on the northwest corner lot of Duval and Southard Streets. The lot comprises of three buildings, two of them facing Southard Street and one at the corner of Duval and Southard Streets. All three buildings are listed as contributing resources to the historic district. 532-534 Duval Street is a multi-use building with residential units on the second floor and access through Duval Street. The two-story building was built circa 1899 and its front and street side elevations have been altered. Before the demolition of the façade the corner was chamfered, and a non-ADA compliant ramp was built on the corner. The building at 419 Southard Street was build circa 1889 as a two-story residence but at some point, the first floor was changed for commercial purposes. In the last decades the building's façade was leaning towards the back.

Last summer staff worked with the engineer of the project as he submitted several sketches for the front façade of 532-534 Duval Street. The contractor submitted building permits applications for interior partial demolition and new footings and concrete slab for both 532-534 Duval Street and 419 Southard Street. HARC staff requested the Building Department to assess the conditions of the construction site as we have not approved any construction plans for the exteriors and

concluded that the contractor exceeded their permitted scope of work, which ended in a red tag. Subsequentially HARC staff approved the installation of siding on the corner building and requested the contractor to properly secured the entry to the interior of the buildings and to submit a Certificate of Appropriateness application for the rest of the exterior work.

Ordinances Cited on Review:

- Section 102-217 (2), demolition for non-contributing or non-historic structures of the Land Development Regulations for storefronts at 532-534 Duval Street.
- Section 102-217 (4), demolition for contributing or historic structures of the Land Development Regulations for façade at 419 Southard Street.

Staff Analysis:

The Certificate of Appropriateness under review is for the after the fact removal of non-historic storefronts at the corner building facing Duval Street and the removal of the first-floor front façade and partial demolition of posts of 419 Southard. The applicant has submitted plans for the replacement of doors and storefronts for the corner building and the removed elements were non-historic. The historic architectural review commission shall not issue a certificate of appropriateness that would result in:

- (1) Removing buildings or structures that are important in defining the overall historic character of a district or neighborhood so that the character is diminished;
 - It is staff's opinion that the after the fact removal of the non- historic storefronts did not affected the historic integrity of the building. The building has been standing without a front façade for months.
- (2) Removing historic buildings or structures and thus destroying the historic relationship between buildings or structures and open space;
 - The structure has been standing without a front façade for months.
- (3) Removing an historic building or structure in a complex; or removing a building facade; or removing a significant later addition that is important in defining the historic character of a site or the surrounding district or neighborhood.
 - The design brings back the contained 90-degree corner and keeps historic columns.
- (4) Removing buildings or structures that would otherwise qualify as contributing, as set forth in section 102-62(3).

The building in question is a contributing resource to the historic district. The removed elements were not historic nor will had qualified as contributing in a near future.

For the after the fact removal of the first-floor front façade of 419 Southard Street, staff opines that there were historic elements that were removed, including structural elements and lower portion of a window sash. The historic architectural review commission shall not issue a certificate of appropriateness that would result in:

It is staff's opinion that the request for this demolition should be reviewed based by the demolition criteria of Chapter 102 Section 218 of the LDR's. The criteria state the following;

- (a) The historic architectural review commission shall issue a certificate of appropriateness for an application for demolition:
 - 1. If the subject of the application is a contributing or historic building or structure, then it should not be demolished unless its condition is irrevocably compromised by extreme deterioration or it does not meet any of the criteria of section 102-125(1) through (9).

Although the building was leaning towards the rear staff recollection of the front elevation of the building was that it did not presented any decay or extreme deterioration.

As staff understands that there was no extreme deterioration on the elements that were demolished, therefore the following criteria under section 102-125 must be applied to this review:

1 Embodies no distinctive characteristics of a type, period, or method of construction of aesthetic or historic significance in the city and is not a significant and distinguishable building entity whose components may lack individual distinction;

Staff cannot attest to this. Although the building was originally built as a dwelling in earlier stages the first floor was changed for a commercial use. Staff was not able to find historic photos to show how fenestrations were arranged. Nevertheless, a historic window sash was removed during the unpermitted demolition.

2 Is not specifically associated with events that have made a significant contribution to local, state, or national history;

It is staff understanding that no significant events have ever happened in the site that has contributed to local, state, or national history.

3 Has no significant character, interest, or value as part of the development, heritage, or cultural characteristics of the city, state or nation, and is not associated with the life of a person significant in the past;

Staff cannot attest to this.

4 Is not the site of a historic event with a significant effect upon society;

It is staff's understanding that the site is not associated to any significant event.

5 Does not exemplify the cultural, political, economic, social, or historic heritage of the city;

Historic windows are an integral part of a building and should have been protected.

6 Does not portray the environment in an era of history characterized by a distinctive architectural style;

Staff cannot answer this question as there is no evidence on site to corroborate elements, like structural components.

7 If a part of or related to a square, park, or other distinctive area, nevertheless should not be developed or preserved according to a plan based on the area's historic, cultural, natural, or architectural motif;

This is not the case.

8 Does not have a unique location or singular physical characteristic which represents an established and familiar visual feature of its neighborhood or of the city, and does not exemplify the best remaining architectural type in a neighborhood; and

The building does not exemplify the best remaining architectural type in its neighborhood.

9 Has not yielded, and is not likely to yield, information important in history.

Staff cannot attest to this as there is no evidence to be analyzed.

The removal and demolition of elements destroys tangible evidence needed to form adequate conclusions. Once a historic element is demolished it is lost. Reconstruction of an element does not bring the historic value and character of a structure back but diminishes the quality and erases the history forever. Staff finds that the removal of elements without any consent or approval, whether historic or not, is contrary to the principles of HARC, as the City Charter affirms. If

approved, there will be one reading for the demolition of the storefronts of the corner building and two readings for the building facing Southard Street.
