Kids Challenge Course

*The Drop Tower
Jackson Hole Mountain Resort
Teton Village, WY*

Drop Towers

The Drop Tower is an exciting product offered by Bonsai Design that can be constructed to immediately enhance and supplement existing recreational programs, in addition to jump-starting future activities. Designed with a minimal footprint and maximum output potential, the Drop Tower allows for an optimized Participant Experience, with hundreds of participants being able to use multiple elements in a short time frame.

The goal of the Drop Tower is to create a pinnacle experience with multiple activity options and maximum throughput. Due to the modular build of the tower, the Drop Tower can be incorporated into an existing program or act as a stand alone feature that provides the exclamation point to an existing infrastructure. The optimized throughput allows the Drop Tower to provide almost immediate Return on Investment.

Custom Options

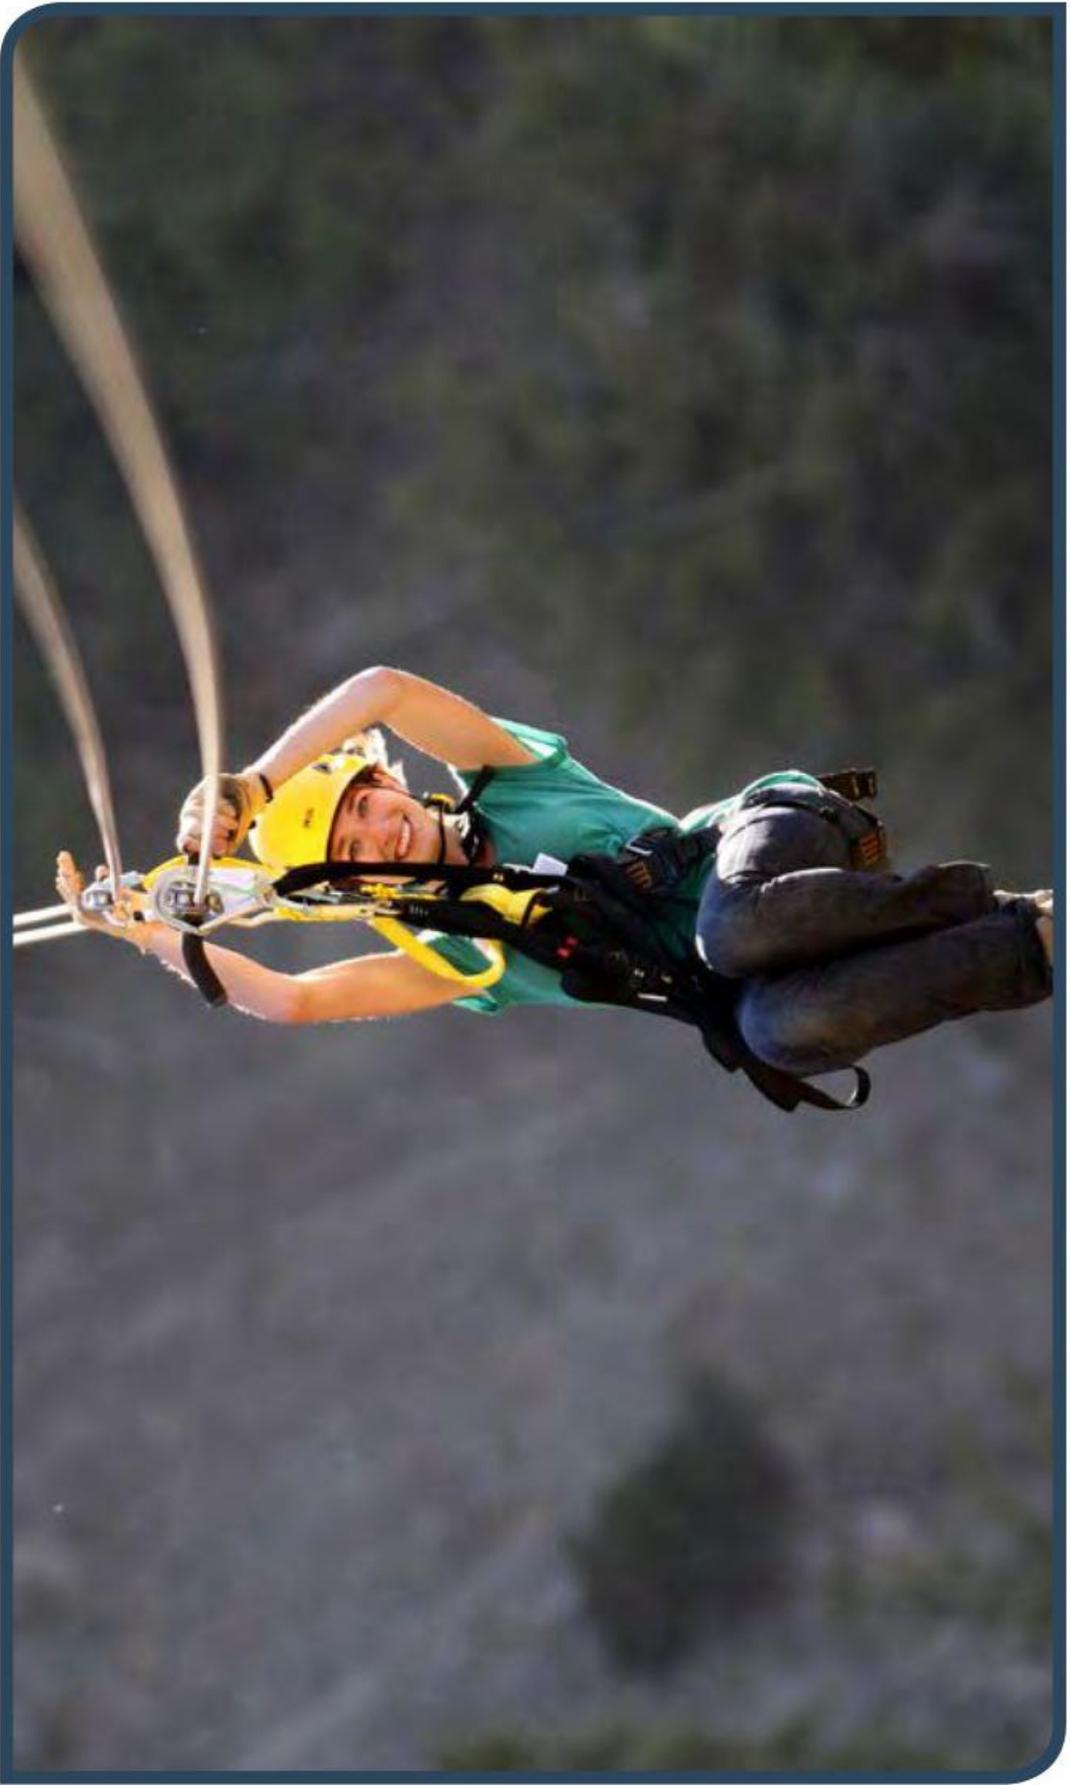

Bonsai Design can install custom-designed Drop Towers to include multiple ascent and descent elements for specific operational needs and program goals, including:

- Zip Lines
- Climbing Stations
- Rappelling Stations
- Intro to Free Fall
- Advanced Free Fall

Barnardsville, North Carolina*

Bonsai was approached with the concept of installing a zip line for a corporate party (and not just any zip line, the “Best” zip line). In a short time-frame, the end result was a 1,138 foot zip line spanning the campus, anchored into the corporate headquarters building. Bonsai designed, installed and operated the zip line and became a huge part of a ceremonious weekend in Alabama.
